

Business Success in Tough Times Workshops - 2009

What are the secrets of business success in an economic downturn? How do business owners stabilize their business during tough times and hold their own? Attend a seminar to learn how to prepare for and even grow your business when the economic climate is stormy. Presented jointly by the North Carolina Community College Small Business Center Network and the UNC Small Business & Technology Development Centers (SBTDC). A variety of resources and the opportunity for free business counseling will be made available to seminar participants. Check back often because more events will be added as they are scheduled!
